

```
entry:  
br label %return
```

The diagram shows a control flow graph with two nodes. The top node, labeled 'entry:', contains the instruction 'br label %return'. A vertical arrow points from the bottom center of this node to the top center of the bottom node. The bottom node, labeled 'return:', contains the instruction 'ret i32 0'.

```
return:  
ret i32 0
```

CFG for 'foo' function
